INTRODUCTION

I am a UX/UI Designer with extensive experience in the HealthTech industry, specializing in creating user-centered designs.

With a focus on intuitive interfaces and seamless user experiences, I thrive on turning complex data into actionable insights for professionals. Passionate about using design to make a meaningful impact, I bring a blend of creativity, technical skill, and problemsolving to every project.

EXPERIENCE

SOPHiA GENETICS – Senior UX/UI Designer
Rolle (VD) | 2020 – 2025

Ho Chi Minh City (Vietnam) | 2014 (3months)

EDUCATION

IAE Savoie Mt.Blanc – Licence, Infocom - Hypermedia
Annecy | 2012 – 2015

RECENT WORK

At Sophia Genetics, I focused on crafting the web versions of both new and established products. Within the healthcare domain, designing user experiences and interfaces presents a captivating blend of intrigue and challenge.

What I find most rewarding is the effort to simplify and customize each view to best serve the needs of doctors and clinicians in their daily tasks.

Additionally, I was responsible for establishing and maintaining the design system for the company's software platform.

This involves ensuring that the developers utilise the correct components and collaborating with them to enhance layouts and implementations for optimal display performance.
